

¹**Indications for Use (IFU):** Closed head injury, Ages 18–85, Within 72 hours of injury, GCS of 13 to 15

²**Equivocal Results (SIC):** SIC negative, close to positive cutoff; triage decision is left to the provider's discretion.

³**Brain Function Index (BFI)** Patients with BFI <50 are typically referred to Concussion Management Practice for follow-up. BFI percentile can assist provider in concussion diagnosis.
