

Indications & Results Interpretation Guidance for BrainScope

Indications for Use:

Closed head injury; GCS 13-15
 13-85 years old
 PROVIDER ORDER

			BrainScope Algorithm	
PATIENT AGE	TIME SINCE INJURY	GCS SCORE	STRUCTURAL	FUNCTIONAL
13-17*	No time limit	GCS 15		CI
18-85	Within 72 hours	GCS 13-15	SIC	BFI

* in acute setting

Results: Indicate Actions Taken

Structural Injury Classifier (SIC)	Brain Function Index (BFI)	Concussion Index (CI)
Indicates likelihood of being negative for brain bleed on a CT and identifies the need for further evaluation Negative: Equivocal: Evaluate:	Indicates probability of brain function impairment. Objective marker of concussion that scales with severity. consider referral for concussion management concussion referral not indicated	Objective measure of the likelihood and severity of concussion at time of injury and throughout recovery. consider referral for concussion management concussion referral not indicated
